Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 17(2) of such treaty in the English language.

Claims 1 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by US 6,828,406 to Haasmann et al.

Regarding Claims 1 and 5. Haasmann et al. teaches a compound (Formula I) with one or more dienophile groups, one or more ring structures comprising two conjugated carbon-carbon double bonds and a leaving group (Column 3, Lines 6 – 39; Column 4, Line 63 – Column 5, Line 25) . The compound further comprises side groups (S^n) which may be discotic phthalocyanines (Column 8, Line 47 – Column 11, Line 19), a mesogenic moiety. Haasman et al. further teach the compound can be used to prepare a crosslinked polyphenylene polymer (Column 7, Lines 28 - 51).

Allowable Subject Matter

Claims 2 – 4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the closest prior art of record (US 6,828,406 to Haasmann et al.) fails to teach or suggest the compound of Formula I, as set forth in Claim 2, comprised of a five-membered ring to which the claimed leaving group and mesogenic poragen-forming moiety are attached.
